

TEMPO+ 6-HOUR G/T UPDATE GROUP APPLICATION AND ASSESSMENT OPTIONS

ASSESSMENT OPTION 1:

As a group, discuss the strategies, tools, or techniques shared in the videos and articles. What did each person learn or what strategies or tools do they want to try in their classroom?

In small groups or pairs, each educator will develop an action plan to implement at least one of the strategies, tools, or techniques learned from the videos and articles within their classroom or school. The action plan should include expected student outcomes, instructional activities aligned to standards/curricula, and evaluation strategies.

ASSESSMENT OPTION 2:

On their own, educators will create or modify their lessons or activities to implement the tools, strategies, or techniques selected in their action plan. Then, educators will apply the new lessons to their classrooms/schools/instruction and take notes or observations on what worked best and what did not work well. Educators may also consider getting student feedback or colleague feedback on the new lesson/activity.

In small groups or in pairs, educators then will share and compare their experiences applying the new strategy, tool, or technique to their instruction, discussing which elements worked best or didn't work and why they felt this outcome occurred. Together, the educator groups will collaborate on or create changes/solutions/modifications to the strategy they want to implement to make it more effective or more applicable to their instruction.
